MODEL SELECTION AND VALIDATION REPORT ( haul_duration model )
--------------------------------------------------------------------

## OBSERVATIONS:3449

## SANITY: OK − all models in the selection process passed sanity checks.

## SELECTED RANDOM TERM: spatiotemporal_random_fields_ar1

## MODEL SUMMARY ( haul_duration model )

Spatiotemporal model fit by REML ['sdmTMB']
Formula: fixed_formula
Time column: year
Family: gaussian(link = 'identity')

Conditional model:
            coef.est coef.se
(Intercept)    11.06    2.23
haul_dur        0.06    0.03

Dispersion parameter: 2.42
Spatiotemporal AR1 correlation (rho): 0.98
Matérn range: 541.80
Spatiotemporal marginal AR1 SD: 4.28
REML criterion at convergence: 8272.110

See ?tidy.sdmTMB to extract these values as a data frame.

## SELECTION STATISTICS
                                                    df      AIC  delta_AIC
spatiotemporal_random_fields_ar1                     6 16556.22   2.991426
